

VISHNU BHUVANACHANDRAN

Data Analytics | Data Governance | Power BI | Reporting | SQL

+353 894 083 666 | vishnubr.nitt.me@gmail.com | linkedin.com/in/drvishnubr | Dundalk, Co. Louth, Ireland

PROFESSIONAL SUMMARY

Data Analytics professional with 10+ years of experience spanning data management, reporting, data validation, and Power BI dashboard development across research, academic, and industry settings. Demonstrated ability to build reliable analytics pipelines, maintain data accuracy to governance standards, and deliver actionable insights to cross-functional stakeholders. Academic grounding in GDPR principles and data protection through MSc Data Analytics, supported by hands-on experience preparing ethical consent documentation for research projects. Experienced in Agile environments with a strong track record of producing structured, well-documented analysis. Eager to contribute analytical and reporting skills to a privacy programme governance function.

KEY COMPETENCIES

Power BI Dashboard Development | Data Transformation & Validation | SQL & PostgreSQL | Data Reporting & Documentation | Statistical Analysis & Trend Forecasting | Data Quality Management | Stakeholder Communication | Python & R (Shiny) | GDPR Principles (Academic) | Agile Methodology | Research Documentation | Ad-hoc & Scheduled Reporting | Data Governance Practices | Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Starilum Limited

Data Analyst

Drogheda, Ireland

June 2025 – Present

- Maintain and manage complex datasets using SQL and Excel, ensuring data accuracy and consistency through daily validation in alignment with internal data governance standards.
- Develop and maintain Power BI dashboards integrating multiple data sources, transforming data into actionable insights for cross-functional reporting.
- Generate regular and ad-hoc reports for stakeholders, documenting data sources, transformation steps, and key insights to support structured, accountable reporting.
- Collaborate with stakeholders on trend analysis and performance tracking, delivering analysis with supporting narrative to enable data-driven decision-making.
- Identify and resolve data quality issues, driving process improvements and operational efficiency in a fast-paced environment.
- Achieved an 80% increase in organisational research capabilities within 5 months by enhancing reporting infrastructure and integrating disparate data sources.

Marian Engineering College

Research Lead & Associate Professor

Kerala, India

Sept 2019 – Aug 2024

- Managed data records for a multi-phase INR 12 Lakhs EV battery cooling research project, tracking HR position data and expenditures in Excel with actual vs. budget variance reporting, ensuring compliance with governance standards.
- Coordinated a 30+ member team on an Electric Go-Kart project, producing daily performance tracking reports, ad-hoc analysis, and structured metrics documentation; contributed to national award recognition and a 90% improvement in innovation metrics.
- Founded an Energy Research Lab, establishing data reporting frameworks that integrated socio-economic datasets to improve data accuracy and stakeholder reporting.
- Led the INR 28 Lakhs Handloom and Coir Cluster Mapping project, performing trend analysis and budget modelling to support planning and stakeholder reporting.

Indira Gandhi Centre for Atomic Research (DAE, Govt. of India)

Senior Research Fellow

India

May 2014 – Jan 2019

- Performed data validation and statistical analysis in Excel and Minitab, maintaining data accuracy standards aligned with international governance frameworks (NIOSH/AWS).

- Produced structured compliance and performance reports for health and safety oversight panels, supporting evidence-based decision-making.
- Collaborated with cross-functional teams on sustainability projects, tracking operational metrics, budgets, and efficiency trends, achieving a 90% improvement in process efficiency and stakeholder trust.
- Reduced Cr(VI) emissions by 70% through rigorous data analysis and clear reporting of findings to regulatory and safety stakeholders.

ACADEMIC PROJECTS — MSc DATA ANALYTICS

Dundalk Institute of Technology, Ireland | MSc Scholar | Sept 2024 – Aug 2025

The following projects were completed as part of MSc coursework and independent research modules:

- **Cattle Disease Prediction System:** Built and deployed a machine learning model managing 2.3M+ data points on imbalanced data; prepared ethical consent documentation and applied data protection practices in line with GDPR principles studied during the MSc programme.
- **Cyber Threat Reporting Dashboards:** Created interactive Power BI and Shiny dashboards using Python, JavaScript, and HTML to visualise cyber threat data, including sunburst diagrams and trending graphs.
- **Global Data Integration Analysis:** Integrated multi-source datasets (mortality, urban population, urban area, EV sales) to perform comprehensive comparative analysis with documented data transformation steps.
- **Drogheda Bus Route Planner:** Optimised data processes using Neo4j graph database to enhance data integrity and route efficiency through graph-based validation.
- **Transformer-Based Time Series Analysis:** Evaluated performance of 3 time series models using 1M+ synthetic temperature data points, producing structured analysis reports.

EDUCATION

Dundalk Institute of Technology <i>MSc in Data Analytics — First Class Honours</i>	Ireland 2024 – 2025
• Modules included: Data Governance, GDPR & Data Protection Principles, Machine Learning, Data Visualisation, Statistical Analysis	
National Institute of Technology Tiruchirappalli <i>PhD in Mechanical Engineering (Environmental Safety & Occupational Health)</i>	India 2014 – 2019
University of Kerala <i>M.Tech in Thermal Science</i>	India 2011 – 2013
University of Kerala <i>B.Tech in Mechanical Engineering</i>	India 2005 – 2009

KEY ACHIEVEMENTS

- **Academic Excellence:** Achieved First Class Honours in MSc Data Analytics, with modules covering data governance, GDPR principles, and advanced analytics.
 - **Research Fellowships:** Awarded multiple prestigious fellowships from IGCAR (DAE – Government of India), reflecting rigorous analytical and governance standards.
 - **Patents and Publications:** Secured 5 Indian patents and authored 10+ peer-reviewed publications, demonstrating strong analytical rigour, documentation, and professional writing skills.
-

TECHNICAL SKILLS

Reporting & BI: Power BI, Tableau, Shiny (R), Python (Matplotlib, Seaborn)
Data Management: SQL, PostgreSQL, Neo4j, Excel, Data Cleaning, Data Validation, Data Quality Management
Analytics: Statistical Analysis, Trend Forecasting, Ad-hoc Reporting, Performance Tracking
Programming & Tools: Python, SQL, HTML, JavaScript, Microsoft Office Suite
Methodology: Agile Development, Research Documentation, Cross-functional Stakeholder Collaboration
Regulatory Knowledge: GDPR Principles (academic study), Ethical Consent Documentation (research projects)
